### Active Screening of Residents

Evaluate residents for the following every 12 hours

#### Common Signs and Symptoms

- Fever ≥ 37.2°C (99.0°F)
- Cough
- Shortness of breath. *Increased oxygen requirements or increased frequency of nebulizer treatments may be surrogate symptoms of shortness of breath*

#### Less Common Signs and Symptoms

- Confusion or change in mental status. *If noted, check pulse oximetry to determine if increased oxygen requirements*
- Muscle aches, headache
- Sore throat, runny nose
- Chest pain
- Diarrhea, nausea and vomiting

*Probable case: any two of the common signs/symptoms*
- Initiate contact and droplet precautions
- Check a room air pulse-oximetry
- Increase frequency of vital signs, including pulse oximetry to every 8 hours
- Screen for influenza. *If negative, screen for COVID-19 (in areas of community outbreak may consider concomitant testing based on clinicians assessment)*

*Possible case: any one of the common signs/symptoms and ≥ 1 of the less common signs/symptoms*
- Initiate contact and droplet precautions
- Check a room air pulse-oximetry
- Increase frequency of vital signs, including pulse oximetry to every 8 hours
